UN Scientific Advisory Board –A New Body with New Vision

The Scientific Advisory Board (SAB) is a new body created by UN Secretary-General Ban Ki-moon in September 2013. It is composed of 26 internationally leading scientists. The SAB is tasked with providing advice to the UN Secretary-General and the Executive Heads of UN organizations on strengthening the interface between science, policy and society, particularly in areas relevant to sustainable development. The recommendation to establish such an advisory body derives from the Report of the Secretary-General's High-Level Panel on Global Sustainability (GSP) which developed a new vision for sustainable development.

*In its report "**Resilient People, Resilient Planet: A Future Worth Choosing**", the GSP also presented recommendations regarding a strengthened interface between science, policy and society. Evidence-based decisions at the level of government, especially as concerns issues of sustainable development, depend on up-to-date scientific knowledge. Decision-making should be informed by the best available evidence co-designed, co-produced and co-delivered by the relevant stakeholders. Such evidence should be made available not only through the lenses of specific scientific disciplines but also through transdisciplinary approaches. The GSP recommended that the UN Secretary-General, among others, appoint a scientific advisory body or a chief scientific adviser.*

The SAB will cover a broad spectrum of scientific expertise and will be able to work on the social, economic and ecological dimensions of sustainable development. As many research fields as possible should be involved, as well as a balanced representation of the world regions according to the UN definition. Furthermore, gender balance is to be achieved.

The SAB can play a crucial role in democratizing knowledge generation and sharing, building public trust, and supporting the active partnership of scientists and civil society networks in decision-making. IJONS and Young scientists are ready to help. Thank you.
