# **National Pollution Control Day 2018**

*The National Pollution Control Day is celebrated every year on 2<sup>nd</sup> of December in India in order to give the honor and memorialize the thousands of human beings who had lost their existence because of the Bhopal gas calamity. Bhopal gas tragedy was happened in the night of 2<sup>nd</sup> and 3<sup>rd</sup> December in the year 1984 because of the unintentional discharge of the poisonous chemical known as Methyl Isocyanate (also called MIC) as well as some other chemicals released from the Union Carbide Chemical Plant positioned in the city.*

*According to the report, more than 500,000 people (of which around 2259 were died immediately) were exposed to the poisonous gas of MIC. Later, it was declared by the government of Madhya Pradesh that around 3,787 deaths were related to the gas tragedy. In the next 72 hours, around 8,000 to 10,000 people were died whereas around 25,000 people were died later because of the gas-related diseases. It was identified as the biggest industrial pollution disaster of the history worldwide which needed serious preventive measures suddenly in order to stay away from such type of disaster in the future.*

*One of the leading factors of celebrating the national pollution control day every year is to manage and control the Industrial Disaster as well as prevention of the pollution (created by the industrial processes or manual negligence) of water, air and soil. Varieties of laws are declared by the Government all over world in order to seriously control and prevent the pollution. National pollution control day is celebrated every year on 2<sup>nd</sup> of December to make aware the people and most importantly to aware the industries about paying great attention towards the need of Pollution Control Acts. Indian government has launched the variety of serious acts and rules for the control and prevention of pollution all over the India.
