### **World Veterinary Day – Protect our Animals**

*For nearly 20 years, World Veterinary Day has been an opportunity to celebrate the contributions of veterinarians to the health of animals and society. Each year, the World Veterinary Association that has undertaken activities that best embodies the annual theme of the*

*World Veterinary Day Award. The 2019 World Veterinary Day will celebrate the Value of Vaccination. Vaccines are one of the most valuable tools in any veterinarian's arsenal. These medicines protect the health of animals and the livelihood of farmers.*

*The World Veterinary Association will co-host the 2019 World Veterinary Day Award with Health for Animals, the global animal medicines association. The Award is open to all WVA Veterinary Associations who may submit evidence of any activities that demonstrate their support of the value of vaccination. This could include local vaccine campaigns for animals, educational seminars for the public, media campaigns, new research, or anything else that promotes the value of vaccination. The Award value has increased to USD \$2500. Funds will be provided directly to the Association, which may use it for activities, reward hard-working staff, provide scholarships, support their community, etc. The award is an opportunity to showcase your Association's diligent efforts to the global veterinary community.*

*Vaccination is an essential tool for preventive veterinary medicine, promotion of animal health and welfare, and reducing the risk of human exposure to many zoonotic pathogens. Historically, immunization practices and vaccination protocols have contributed to significantly reduce the prevalence of many life-threatening diseases. The risks of not vaccinating can be significant to individual animals and populations, and can have consequences on livelihoods of rural livestock producers in economically developed and emerging regions.*

*Effective vaccination programs, broadly implemented, are likely to reduce the need for antimicrobials, which in turn can help reduce the risk of emergent antimicrobial resistance. The WVA and Health for Animals believe it is essential for the global veterinary profession to educate the public, particularly animal owners and producers, about the benefits of vaccination for animal, human, and public health. IJONS also encouraging the veterinary students, researchers and clinicians are involving the promotional activities of animal health. Further details, veterinary associations please contact: <http://www.worldvet.org/>*
