The role of homeopathy in primary health care is very vital. Homeopathy is the second largest medical system in the world. Homeopathy was invented by Dr. Samuel Hahnemann, a German physician. Dr. Mahendralal Sarkar was India's first homeopathic physician. Homeopathy is prominent as one of the Indian medical systems. Hahnemann's birthday is celebrated every year on 10th April as World Homeopathy Day. India has the largest number of homeopathic doctors in the world. The distribution of homeopathic medicines in rural areas during the Corona period shows its

importance and its significance. The state of Himachalpradesh in India has the largest number of homeopathic hospitals and users. It is significant that through this the villagers are getting treatment for their primary diseases. The theme of World Homeopathy Day this year (2023) is "**Homeo Parivar Sarvajan Sastra or One Health is One Family**" and this theme ensures that homeopathic medicine is taken to the people in the country's fringes and villages. Based on this, the individual and his family can receive evidence-based homeopathic treatment for health under the guidance of trained homeopathic doctors in the vicinity of villages. It is necessary for every citizen to recognize homeopathy as an option of treatment in their homes' primary health care need. Through this promotion there is an opportunity for homeopaths to develop their skills and research. India is one of the largest homeopathic medicine manufacturers in the world. Here world-class homeopathic medicines are manufactured and brought to the people. Nowadays students are showing keen interest in studying homeopathic medicine. Although books on homeopathy are published in many Indian languages, it is necessary to do long modern research studies in this medicine to increase its richness. In India, the National Institute of Homeopathy and the National Commission for Homeopathy under the Central Council of Homeopathic Medicine, Government of India are doing important frame work for the development of homeopathy system. Studies on the use of homeopathic medicine for cancer, heart disease and many other complex diseases in the pre-operative period should be carried out. These studies can be conducted in conjunction with modern medicine or modern science. And by subjecting the existing homeopathic medicines to thorough the scientific study, we can get a medical system that can be used by everyone. One of the main reasons for this is that homeopathy has the distinction of being low cost, no side effects, and suitable for everyone. On the occasion of the World Homeopathic Medicine Day, the main activities are to carry out modern researches in this medical system, to bring due awareness among the village masses and to establish homeopathic clinics in villages without medical facilities. Let's celebrate homeopathy and preserve its greatness and promote health.
